

# UPPER CERVICAL CORRECTIVE HEALTH CARE

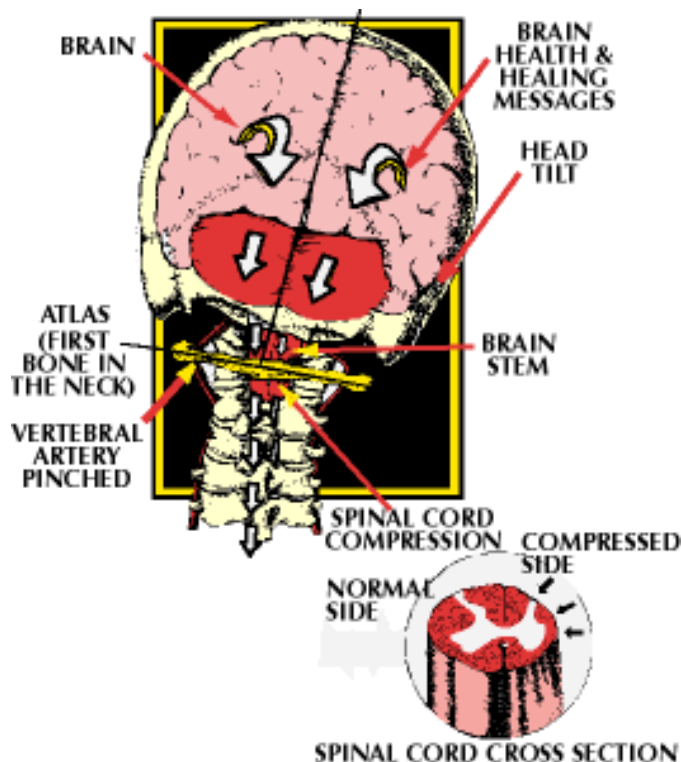

THE NEW NATURAL HEALTH CARE PROVIDER THAT MORE THAN 100 DIFFERENT HEALTH PROBLEMS HAVE RESPONDED TO WITH NO SIDE EFFECTS

Brain health and healing messages leave the brain by way of the brain stem, pass through the neck, down the spinal cord and out over the entire nervous system to all parts of the body.

These messages control, monitor and maintain everything that goes on in the body. They also direct all body healing!!

A fall, automobile accident, whiplash, bad sleeping habits, a bump on the head, bad posture or even a difficult birth can cause muscles of the neck to hold the head and neck in a tilt position.

Often you can stand up straight and look into a mirror and actually see that the head leans toward one side.

This head/neck misalignment can cause interference at the point where the head and neck join and prevent the brain from sending its healing messages to some part of the body.

That part of the body that is not able to communicate efficiently with the brain will begin to develop health problems.

These health problems will continue to develop and grow worse until the brain to body communication is restored.

Upper Cervical Corrective Health Care is an effective, scientifically proven specialty in the Chiropractic profession.

This procedure is designed to restore head/neck alignment to remove interference at the point where the head and neck join and re-activate brain to body communication so the body's natural self-healing process can begin.

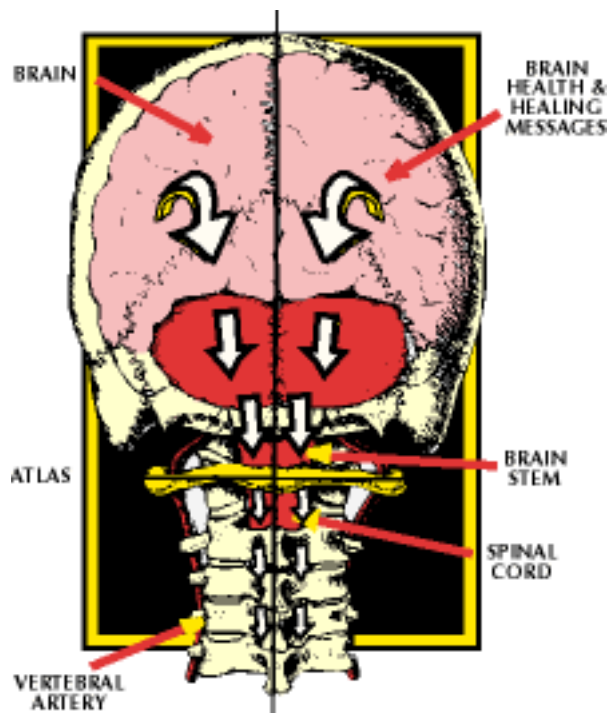

The Upper Cervical Doctor will make x-rays of the head and neck.

The x-rays will show the degree of misalignment.

They will also enable the doctor to develop a correction formula.

The doctor will use the formula to restore perfect head/neck alignment.

This procedure is barely felt by the patient and requires no forceful twisting, pulling or jerking motion of the head and neck.

As soon as the misalignment is corrected, immediately the brain will start sending healing messages to that part of the body affected by the misalignment and begin its natural self-healing process.

Restricted brain to body health and healing messages can be the direct or indirect cause of most health problems.

On each follow up visit the doctor will help the patient maintain their alignment correction so there is no interference in the healing process until it is complete.

Since brain health and healing messages control everything that goes on in the body, any interference in this process explains why so many different health problems will respond to the head/neck alignment correction procedure.

Although more than 100 health problems have responded to this unique approach, it still remains practically unknown by the general public.

When the brain can communicate with all parts of the body without interference we stay well.

When the brain is not able to communicate with some part of the body because of interference at the point where the head and neck join, health problems will begin to develop.

The objective of the Upper Cervical Doctor is to help each patient maintain perfect head/neck alignment so there is no interference in brain to body communication.

This will help the patient live pain free without the use of drugs or pain killers and enjoy a better quality of life.

Upper Cervical Health Care is a healthcare provider for most health problems.

It is natural, safe and cost effective for people of all ages.
